Professional Summary

Computer Science undergraduate at Atria Institute of Technology, Bangalore, with a CGPA of 8.62/10, interested in building practical AI-powered software. I have a solid foundation in data structures, databases, operating systems, and software engineering, with hands-on experience in ML, NLP, LLMs, and full-stack development. Built HiREady, an AI-based mock-interview and job-readiness platform evaluated by 24 students, and co-authored an accompanying research paper on its reliability and usability. My technical skills include Python, JavaScript/TypeScript, SQL, Git/GitHub, and BigQuery. Seeking internship and full-time opportunities in Software Engineering, Machine Learning, and AI Engineering in India.

Education

Atria Institute of Technology

2023 – Present

Bachelor of Engineering in Computer Science and Engineering (CSE) | CGPA: 8.62/10

Bangalore, Karnataka

- **Relevant Coursework:** Data Structures & Algorithms, Algorithms, Database Management Systems, Operating Systems, Software Engineering, Computer Networks, Web Technologies (HTML/CSS, JavaScript), Databases (MySQL)

Experience

Academic Projects & Technical Experience

2023 – Present

Atria Institute of Technology

Bangalore, Karnataka

- Built and delivered academic software projects using Python and modern web technologies, applying structured requirement analysis and software engineering practices.
- Collaborated using Git/GitHub version control and followed testing and debugging workflows to ensure code quality and reliability.

Projects

HiREady - AI-Based Mock Interview & Job-Readiness Platform

React, TypeScript, Express, MongoDB, Groq LLM, Deepgram

- Worked with a 5-person team to build a full-stack mock-interview and job-readiness platform using Groq LLM inference, Deepgram speech transcription, and PDF/DOCX resume parsing (PDF.js, Mammoth.js) across resume, voice-interview, and aptitude-practice modules.
- Achieved 99.4% endpoint reliability (179/180 successful calls) in load testing, with resume-analysis requests completing at a 27.15-second median response time.
- Identified and remediated a grading-integrity vulnerability permitting client-supplied score injection by redesigning the save path with attempt-bound server-side grading and a custom fenced-lease concurrency protocol; verified with a 55/56-passing Jest regression suite across 7 test suites.
- Co-authored a technical research paper evaluating system reliability and usability, recording a System Usability Scale (SUS) score of 74.17 and a +0.95-point self-efficacy gain across a 24-participant student study.

Technical Skills

- **Programming Languages:** Python, Java, C, SQL, JavaScript, TypeScript
- **AI / Machine Learning:** LLM Integration (Groq API), Natural Language Processing (NLP), Prompt Engineering, Speech-to-Text (Deepgram)
- **Web Development:** React, TypeScript, Express.js, Vite, HTML5, CSS3, PHP, Streamlit, REST APIs
- **Databases:** MongoDB, MySQL, BigQuery, Mongoose, Database Design
- **Tools & Platforms:** Git, GitHub, Linux, Bash, VS Code, Jest, Firebase Auth, JWT/bcrypt, Figma, Procreate
- **Core CS Fundamentals:** Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems (DBMS), Operating Systems, Computer Networks, Software Engineering, Agile/SDLC

Soft Skills

- Communication, teamwork, and stakeholder collaboration
- Problem-solving and structured documentation
- Time management and ownership of deliverables

Languages

Kannada (Speak & Write), English (Speak & Write), Hindi (Speak)
